

19 December 1969

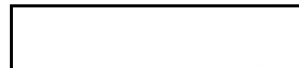

MEMORANDUM FOR:

1. Attached are the first three sections of the paper I am drafting on "Intelligence Planning Assumptions for the 1970's". A fourth section which relates to specific program objectives and management objectives is still being drafted, but I would appreciate any comments you have on the "Intelligence Implications" portions of the attached sections.

2. The single-spaced opening portion of each section is a projection which was provided to me by the Board of National Estimates through Mr. Bross. While I suggest you read this material, I am not proposing any changes to the BNE submission. The material now in draft double space is what I propose to add to the BNE submission as representing the intelligence implications arising from the kind of a world which the BNE forecasts for the 1970's.

3. Your comments on the double-spaced material would be appreciated as soon as you can reasonably get to it.
